PRATHAMESH KASANDE

Amravati, Maharashtra +91-8668415719 prathameshkasande@gmail.com Linkedin Github

PROFILE SUMMARY

Computer Science graduate skilled in Python, SQL, Pandas, Power BI,Machine Learning and Artificial Intelligence. Experienced in data preprocessing, EDA, feature engineering, model building, and visualization through projects and internship work. Seeking an entry-level role in Data Science, AI/ML, Data Analytics, or Python Development.

EDUCATION

Department of Technology,Shivaji University, Kolhapur **2021–2025**
B.Tech - Computer Science and Technology ***Kolhapur,Maharashtra***

TECHNICAL SKILLS

Programming Languages: Python, SQL(MYSQL), OOPS with Python
Libraries/Framework: Pandas, NumPy, Scikit-learn, TensorFlow
Data Handling: Excel (Pivot Tables, Data Cleaning) , EDA , Feature Engineering (Encoding and Feature Scaling)
Visualization Tools : Power BI, Matplotlib, Seaborn
Machine Learning: Regression, Classification, Decision Tree, Random Forest Algorithm, KNN, Clustering (K-Means Algorithm).
AI Technology: Deep Learning (ANN ,CNN,RNN,LSTM) ,NLP
Cloud Technology: AWS(Basics), Git, GitHub, Docker, CI/CD(Basic)
Tools: Jupyter Notebook , VS Code, Google Colab
Soft Skills: Communication, Problem Solving, Team Collaboration, Time Management

INTERNSHIP

NMD.PVT.LTD **July 2025 – Feb2026**
Data Science Intern *Pune ,Maharashtra*

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using Python (Pandas, NumPy) to prepare structured datasets for modeling.
- Built and evaluated machine learning models (regression and classification) using Scikit-learn, applying feature engineering to improve performance.
- Analyzed datasets using SQL queries for data extraction, filtering, and aggregation from relational databases.
- Created data visualizations and analytical reports using Matplotlib, Seaborn, and Power BI to communicate insights effectively.
- Assisted in translating business requirements into data-driven insights through structured analysis and reporting.

PROJECTS

1) Stock Market Analysis | Python, Numpy **Oct 2025**

- Analyzed historical stock price data using NumPy to identify price trends, returns, and volatility patterns.
- Calculated daily returns,mean, variance, and standard deviation to assess stock performance and risk.
- Used NumPy vectorization, slicing, and aggregation functions for efficient numerical analysis and faster computation.

2) Pune House Rent Prediction | Python, Pandas,NumPy,Matplotlib, Scikit-learn,Feature Engineering

Nov 2025

- Developed a Linear Regression rent prediction model using 20,102 Pune housing records, achieving $R^2 = 0.874$ on test data.
- Conducted EDA, missing value treatment, and IQR-based outlier removal to enhance data quality.
- Engineered features from 15 key variables including BHK, area (sqft), furnishing status, floor level, and locality.
- Built a Scikit-Learn pipeline with One-Hot Encoding and Standard Scaling for preprocessing.
- Evaluated model performance using MAE, RMSE, and R^2 metrics.
- Implemented a rent prediction workflow to estimate monthly rent for new property inputs.

3) Sign Language to English Converter for Deaf and Mute People | Python, Machine Learning,CNN ,OpenCV

March 2025

- Designed and deployed a CNN-based deep learning model to classify hand gestures from real-time video streams.
- Performed feature extraction using hand landmarks and optimized prediction accuracy with 92% through spatial analysis.
- Integrated real-time inference pipeline using OpenCV and Keras for live gesture-to-text conversion.
- Enhanced output quality using dictionary-based word suggestions and NLP logic
- This Project had been selected for PM-USHA government funding scheme at 2nd stage

CERTIFICATIONS

- Python - Future Skills Prime Course (Gold Certificate)
- SQL for Data Analysis – WsCube Tech
- Excel for Data Analytics – Coursera
- Fundamental of Machine Learning - Microsoft

EXTRACURRICULAR

- Top Ranker in English in SSC at School Level .
